

5 TIPS TO IMPROVING YOUR INDOOR AIR QUALITY

Looking to make your home healthier by increasing your IAQ (indoor air quality)? You're not alone — many homeowners are taking their breathing air into their own hands, as they spend more time working, playing, and learning from home. Here are five things you can do in your home to reduce indoor air pollution, and keep your home as healthy as possible.

If you are looking to invest in the IAQ of your East Bay area home, schedule an energy audit with Hassler Home Services. Through our comprehensive energy audit, we can evaluate your indoor air quality needs, and provide you with the purification and filtration tools you need to avoid excess allergies and unwanted health symptoms.
